TITO Systems

Eurocoin supplies, installs and supports UK TITO systems in our many clients' sites, providing a cost-effective and secure networked Ticket In/Ticket Out solution. These TITO systems can be integrated with the Thomas Gaming Playstation Plus, offering full Ticket Redemption features, and also connected with our Playsafe 'Quantum' machine management system for automatic data retrieval and analytics.

Eurocoin Systems is an Authorised Service Centre for Ticket2Go, JCM Global's innovative ticketing solution developed for AWP/Low Payout Machine and SAS-based slot machine markets, which is already installed in more than 250 UK gaming venues and on 3000+ machines

Our customer-focused strategy is to ensure that your choice of UK TITO system may be fully & beneficially connected to all other modules in the Eurocoin Systems portfolio, giving your operation a completely joined-up management system.

Playsafe Redemption

Powered by Semnox

Eurocoin is completing the integration of the Semnox redemption ticketing & stock management system into its market-leading Playsafe machine management system.

This will provide FECs with seamless reporting – linking income from data from Playsafe Quantum with cost-of-sales data from the Semnox redemption system to give true, automated performance analysis, for the first time!

The Semnox redemption system manages all swag & prize stocks, integrating ordering, stock control, ticket-eaters and prize giving, with a multi-user interface allowing 4 customers at a time to be served in busy prize shops. Stock can also be issued out to cranes and other prize-vendors for total inventory control.

This data can now be automatically transferred to Playsafe Quantum though this unique integration, defining true costs per machine and allowing operators to evaluate and measure redemption and prize machine performance at an individual level.

The First Truly Integrated FEC Redemption System

Playsafe Quantum Mach

Successful networked systems are all about accuracy and flexibility. The Eurocoin System's Playsafe Quantum machine management system is installed across hundreds of UK gaming venues, providing real-time accounting information to business owners and operators

Key Advantages for Machine Operators Include:

- Full Industry Compliance
- Automated Data Capture
- Paperless Reporting
- Easy to Operate

The Quantum System is a proven, modular solution that automates the monitoring and reporting of your gaming machine data.

Fast, simple and cost-effective, let Quantum collect and analyse your complete revenue and machine performance statistics, including TITO ticket data.

Modern Machine Management for European Operators

Smart Systems for Gaming and Leisure Venues

Playsafe Loyalty

Powered by JCA Systems

Customer loyalty is a major factor in any business, and this loyalty should be rewarded. The leisure industry is now taking significant steps to focus on this, and Eurocoin Systems has, as part of the Playsafe product range, developed and integrated a Customer Loyalty system

Using a state-of-the-art terminal and customer friendly software, the task of rewarding customers is made very easy. The individual and unique design of the terminal makes it stand out and can be used as a "Front of House" welcoming tool for all customers to any gaming centre or bingo club.

The terminal can be designed and enhanced to suit the corporate image of your company.

- The Loyalty Terminal can be designed with eye-catching styling
- Features include touch screen, card reader & printer for receipts
- Customised artwork designs to compliment your brand
- Screen savers for promotional adverts and general advertising

Thomas PayStation

The Thomas PayStation range has been purpose-built for gaming, entertainment and leisure venues. Completely configurable, they provide secure note change, bulk coin processing and pre-payment for goods & services.

All PayStations can be remotely accessed via the Eurocoin Systems Cloud, and our Gaming PayStation Plus is fully integrated with UK TITO systems

- Bulk coin processing of 200 coins at a time
- Recycling capacity of up to 2,700 coins
- Hopper system positioned low for easy access and refills
- TITO Ticket redemption
- Updated firmware with great new features

Secure All Pre-Payments with PayStation

Rent, lease or purchase PayStation for your venue or event:

- Accept customer pre-prepayments for all your goods & services
- Coin, notes & smart cards all accepted
- Add your own products and prices to the on-screen menu
- Prints secure barcoded receipt for clients
- Queue-busting, secure payment kiosk

Machine Management System

Quantum is scaleable to your business. It can be set up from a very basic system, using a handheld device to gather machine meter readings, to a state-of-the-art solution reporting over WiFi. View your gaming operation data on-screen via a graphical representation of the floor layout, plus see machine status notifications real-time from your PC or Laptop.

Quantum will revolutionise your Count Room and Cash Desk operations, saving you hours by automating the collection of your coin, note and TITO ticket data.

Let our accurate & insightful end-of-day reports help you with all your important machine management decisions.

Service and Support from Eurocoin Systems

Helpful, Experienced, Reliable & Professional Back-Up

Innovation & Development

Working with our in-house developers, our worldwide partners, and most importantly, our clients, we are continuously developing our range of Eurocoin Systems to meet the changing demands of the business community we serve.

We offer considerable advantages to our clients, supplying, supporting and integrating a variety of systems and networked products to ensure that customers derive the major benefits of working with a streamlined & forward-thinking systems partner.

"We aim to deliver affordable & innovative systems that will help grow profits for our gaming & leisure sector clients."

Nick Veitch - Director

Field Service Engineers

Need an extra pair of trained hands? ...We can help!

Eurocoin Systems have partnered with E-Service (Europe) Ltd. to offer nationwide field service for our full range of systems and hardware. Our trained and experienced engineers will train and assist your staff at every installation. We offer flexible Service Level Agreements, Planned Preventative Maintenance programmes, and simple site visits whenever you need an extra pair of expert hands

After Sales & Support

Eurocoin Systems clients are supported by our dedicated After-Sales Team.

Working extended hours in the evenings and with weekend online support, our After-Sales Support team will quickly acknowledge your in-bound requests, and then work rapidly to assist you and resolve any issues raised. If an engineer site visit is required, this will be booked on your behalf.

Eurocoin Systems customers can be sure that not only are we there to help, but we are also able to respond to your requests for new system developments that can improve your businesses.

"Our customers work hard enough already! Our goal is to ensure Eurocoin Systems make their lives a whole lot easier..."
